8 Pads Attachment Icon
Guidance on where to attach the pads.

10 Shock Button (Semi-Auto Only)
Flashing button indicates "Ready for shock delivery". Push the button to deliver shock.

12 Status Indicator
AED status, Battery level status, Temperature status, Pads status.

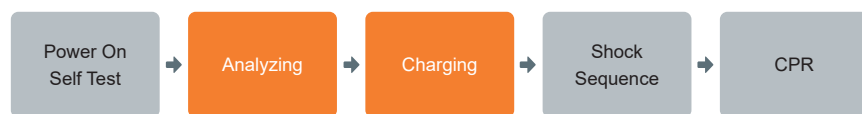

FEATURES & FUNCTIONS

1. Reduction of the defibrillation time

- In order to shorten the time before administering the shock, ECG analysis & charging are performed simultaneously.

»» Before

»» After

2. Selection among 3 pre-installed languages

- Ideal for locations with many foreign visitors or countries with several official languages.

3. Pads Quality Check

- Status of pads can be checked on the status LCD: connection problems, expiration date of pads, used pads, damaged pads, or dried gel. The pads can be changed if a problem is indicated.

4. Pacer Pulse Detection & Rejection

- Accurate electrocardiogram analysis is possible after pacing pulses are removed when the AED is applied to a patient with pacemaker.

HOW TO USE

1
Open the cover & press the power-on button

2
Attach the pads

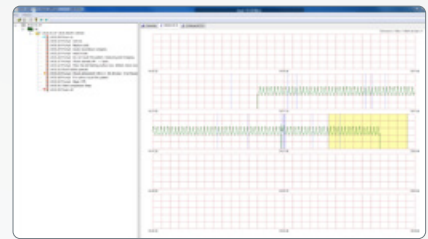

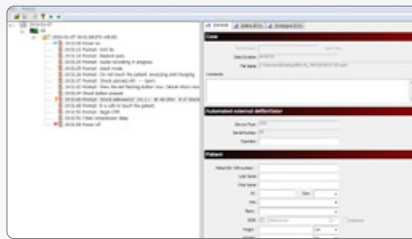

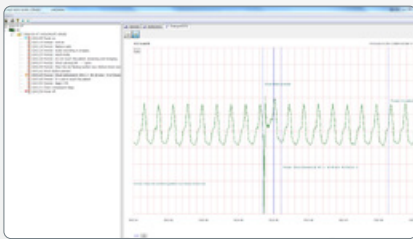

3
Simultaneous ECG analysis & charging

4
Press the shock button (Semi-Auto)
